PROJECTS

- **Made a ATM Machine Software using C language**

    In this project I have made a software using C language for describing the basics of an ATM machine and gave a presentation on how an ATM machine works .

- **Weather Predicting Website using HTML CSS and JAVASCRIPT and API**

    In this project I have made a weather predicting website that can predict the weather for the given location with the help of API . By HTML and CSS I have made the interface of the website and using Javascript I have linked the website and openweather.com which provide the live location weather.
